**NOTES:**

To follow rotation, list players names. For next game, the # of innings completed from last game will determine what line to place the 1st player on. Eg. If 5 innings were completed last game, list the 1st player on line #6 and follow same order as last game, adding bottom names at the top. If 6 innings were completed, put 1st player on line #7, etc. (Make sure you list the names whether they show up to the game or not, otherwise you won't be following the rotation. If you need to trade off pitchers or catchers, simply trade them with a player scheduled for the infield.)
